

MAINTENANCE & REPAIR

Avoid the Unexpected Breakdowns

With LeasePlan's maintenance and repair management, you'll get full-service support for all aspects of fleet and warehouse equipment maintenance. While no two fleets or equipment are utilized the same, our MRM program is tailored to support your operations by offering both preventative and corrective solutions ensuring that your vehicles and drivers are taken care of on and off the road. Our MRM program is fully customizable based on your fleet's and warehouse's specified maintenance parameters — even down to the asset level. From our network of national account service centers to national, standardized pricing, we have the right solutions for you. LeasePlan also helps reduce time and control costs with the end-to-end maintenance administration so you're as efficient as possible.

With LeasePlan, you get:

- + Vast network of ASE-certified truck technicians to service, maintain and repair your trucks
- + Access to an expansive network of over 2,000 nationwide authorized service facilities
- + Seamlessly integrate existing service providers and vendors
- + Breakdown Services
- + Centralized access to maintenance history down to the vehicle and equipment level
- + Comprehensive reporting through our online fleet management tool, ePlan
- + Easy service authorizations process
- + Negotiated repair costs to help maximize your maintenance spend with continuous annual spend monitoring and benchmarking to standardize and exceed performance
- + Customizable Vehicle Maintenance Guides (VMGs)
- + Truck tire consultancy services and purchasing program
- + Battery consultancy services and purchasing program
